

XT20 Dual Head, Super Powerful Tactical Flashlight

The new KLARUS XT20 is stealthy and powerful. Its slender form and magnificent power (1200 lumens) makes it ideal as a night patrol flashlight and searchlight.

The super bright XT20 has two heads, which produce a wider, more intense beam than single head flashlights. Each head contains a high power CREE XM-L U2 LED, which allows XT20 to pierce the darkness with 1200 lumens of light from just 2x 18650 batteries. This makes it the brightest 2x 18650 flashlight in the world, when compared with other flashlights of its size.

The new KLARUS XT20 uses the innovative XT series dual-button tail switch, which provides extremely fast access to the strobe mode. The unique XT tail switch also allows you to fully operate the light with just your thumb. So you don't need to fiddle with buttons in two different places.

With so much powerful light, an intense strobe effect and slender design, the XT20 is an ideal choice for searching (Police and Search & Rescue), CQB, exploration and as an automobile standby flashlight. It can also be weapon mounted and used with the KLARUS ED10 pressure switch for remote control.

Features :

- ※ Two flashlight heads, each containing a powerful CREE XM-L U2 LED to produce a wide, intense beam with good throw ability.
- ※ Impressive maximum output of 1200 lumens.
- ※ Dual-button tail switch, for quick one hand operation. No need to fiddle with switches in two different places and the buttons are easy to locate in the dark.
- ※ Strobe can be activated with the mode button when the flashlight is on or off, giving instant access to strobe from any mode. This makes the XT20 extremely effective for self-defense and CQB.
- ※ Flat side head for wear comfortable
- ※ Forward tactical main switch with momentary activation
- ※ Max runtime of 205 hrs.
- ※ Reverse polarity protection protects flashlight and battery from damage.

Specification:

- ※ Two CREE XM-L U2 LEDs, each with a lifespan of up to 50,000 hours.※ Three lighting modes and one flashing mode:
 - —High brightness: 1200 lumens (2 hr)
 - —Medium brightness: 370 lumens (5.3 hrs)
 - —Low brightness: 10 lumens (205 hrs)

□ —Strobe: 1200 lumens (4 hrs)※ Working voltage: 7.0V - 14.0V

- ※ Battery: 2x 18650/ 4x CR123A
- ※ Body color: Military grey
- ※ Entire length: 218.8 mm
- ※ Head dimensions: 68.8mm (length) x 67.3mm (width) x 33.5mm (height)
- ※ Body dimensions: 170mm (length) x 28mm (diameter)
- ※ Net weight: 250g (excluding battery)
- ※ Material: Aerospace-grade aluminum. Hard-anodized anti-abrasive finish
- ※ Waterproof to IPX-8 Standard (underwater to 2 meters)
- ※ Lens: Toughened ultra-clear, durable glass
- ※ Anti-roll and anti-slip body design
- ※ Accessories: Heavy duty holster, removable metal tactical ring, two spare O-rings and spare rubber boot

Note:

The above-mentioned parameter is only an approximation. Two 18650, 2600 mAh lithium-ion batteries were used in our tests. Results may vary with different batteries and environments.

Battery Replacement

Unscrew the tail cap of the flashlight and insert the battery with positive side toward the light's head. Screw the tail cap back on to operate the light.

Tactical ring Installation

fix O-ring first, then fix tactical ring ,at last fix tailcap

Operation:

- ※ To activate constant on, press the tail/ higher switch fully so that it clicks. To turn the flashlight off,

press tail switch fully so that it clicks.

- ※ Changing brightness levels: When the flashlight is on, press the mode button and then release it immediately. Repeat this to change the brightness level: High-Medium-Low.

※ Strobe access: With the flashlight switched off, press the mode button for instant access to strobe. With the flashlight switched on, press and hold the mode button down for more than 0.8 of a second to access strobe. Release the mode button within 2 seconds to return to your previous lighting mode. Holding the mode button for longer than 2 seconds will lock the light in strobe mode. Pressing the mode button will stop the strobe and return the light to its previous lighting mode.

- ※ Momentary activation: Lightly press the main tail button without clicking it.

Usage and Maintenance

- ※ Do not shine light directly into eyes.
- ※ You can use 16340 batteries, but battery over discharge may damage the batteries.
- ※ Remove battery when stored for extended periods.
- ※ Replace and lubricate O-rings as needed to maintain IPX-8 rating.
- ※ Use soft brush and soapy water to clean the body of the flashlight.

Warranty Service

Klarus guarantees the flashlight against defects in material and workmanship. Flashlight products that are found to be defective under normal use within 2 years of the proof of purchase date will be repaired or replaced without charge. This warranty does not cover damage caused by accident, unreasonable use or product alteration. Failure to follow the general maintenance directions could result in damage to your flashlight that may not be covered by the Klarus warranty.

If this flashlight should prove defective, the product will be repaired or replaced, under the above terms. Please contact Klarus or your original Klarus dealer for warranty return instructions
